PF M134A3

- Only variable rate of fire mini-gun
- Ammunition boost capability allows expedient reloading in around 8 seconds – keeps the weapon in the fight longer
- The brushless variant features the ability for the operator to program their lower and upper rates of fire, eliminates the failures seen in other M134 systems, has increased on target performance, and provides a significant reduction in stoppage
- Available in 7.62mm and 5.56mm

PF M134A3 Remote Weapon Station

The PROWS offers the lightest, most compact, self-contained powered remote weapon system available; specifically focused on delivering improved lethality through a range of caliber options (7.62mm, 5.56mm and future calibers).

This document is not subject to the controls of the International Traffic in Arms Regulations (ITAR) or the Export Administration Regulations (EAR). This document is not export controlled.
